PROFILE

5+ years building responsive web apps and cross-platform mobile experiences.

TECH SKILLS

Frontend & Mobile

- React
- React Native
- Vue.js
- Next.js
- TypeScript
- JavaScript
- HTML5
- Tailwind CSS
- Material-UI
- Bootstrap
- Flexbox / Responsive

Backend & Tools

- Node.js
- REST API / JSON
- GraphQL
- Socket.io
- Redux
- Git / GitHub
- SCRUM / CI-CD

Platforms

- Android / iOS
- Auth0
- Web

LANGUAGES

Spanish — Native
English — B2 Upper

EDUCATION

B.S. Informatic Engineering
UCA — José Simeón Cañas
2016 – 2021

WORK EXPERIENCE

Designli Sep 2024 / Current

React Native / Mobile Developer

Contributed to create a mobile app for Wzrd, a network of clinics and doctors to bring transparency on pricing and costs to USA patients.

- Includes auth0 integrationg to manage authentication.
- API Rest integrations to make a search engine so that patients can apply filters for their search results.
- Mapview to see clinicians and clinics nearby patient with pricing details so that he compares his best option.
- An elegant detail screen for clinics and clinicians profile simulating tabs scrolling per section.
- Additionally you can view the results as a list.
- Mark clinics and clinicians as favorites and see them listed.
- Send support requests so that patients can contact clinics or clinicians.
- A support requests history.
  Demo: https://www.wzrdcare.com/

Frontend Web Developer

A network of clinics and doctors that lets patients in the USA search by symptom or specialty, see real procedure prices up front, and book directly — instead of guessing what care will cost.

- Admin panel where clinic administrators and clinicians manage their locations and staff so patients can find them in the app.
- Hierarchy management: a doctor creates a group, then every location and clinician under it (HealthEntity).
- Services and bundles configured per HealthEntity.
- An inbox for incoming patient requests, plus a support queue for technical issues.
- A metrics dashboard per HealthEntity — profile views, service and bundle counters, calls and requests.
- Stripe billing settings.
- Demo: https://www.wzrdcare.com/

CITYLAB Aug 2023 / Jul 204

Frontend Web Developer

Private government software. Every system on this engagement — the ANDA and MINSAL platforms and both field apps.

- Led frontend development for ANDA's (National Water Authority) administrative system using React and Tailwind CSS — building responsive, accessible, and modular UI components.
- Built and maintained web modules for MINSAL's (Ministry of Health) inventory management system using Vue.js, integrating dynamic components and REST APIs.
- Developed server-side business logic with Node.js to support MINSAL's administrative platform, ensuring scalable and maintainable services.
- Collaborated closely with backend teams to define API contracts and improve

SOFT SKILLS

- Proactive
- Team Work
- Resilience
- Goal-oriented
- Assertive decision-making

2020

data-fetching performance across modules.

FOCUS ITO May 2022 – Abr 2023

React Native / Web Developer — Contract

Helped in the creation of Errand from UTAH U.S.A. They are a business focused on delivering packages of different sizes and weights. So they needed an application to improve their logistics and transportation packaging process. Similar to an uber app, a Client sends a request and a runner driver accepts it. I focused on the runner driver development, and it included the following features:

- Authentication module builded from scratch
- Native device feature integrations such as access to camera, maps and background location.
- Real time Chat for communication system.
- Real time connection to handle Errands on demand.
- Geolocation tracking from runner users to let clients know errands status.
- A history of completed errands .
  Demo: https://shorturl.at/ntCX2

FEATURED PROJECTS

Finnhub Stock App Oct 2023

- Real-time stock dashboard consuming Finnhub.io WebSocket and REST APIs live chart visualizations with Recharts, price alert notifications, and full Auth0 authentication.

Stack: React Native · Socket.io · Recharts · Auth0
Github: https://github.com/didier-cruz/FintechApp
Demo: https://surl.li/cclxcm

Movies App April 2022

- This is a project made with react native and typescript. I developed a login and register screens with provided endpoints, and also the movies section to display for clients.
- *Stack: · ReactNative · REST API · Typescript · React Navigation*
- *Link: https://github.com/didier-cruz/MoviesApp*
- *Demo: https://surl.lt/geotzp*

Tin Marin Museum Aug 2020

- This is a project made with react native and typescript. I developed a login and register screens with provided endpoints, and also the movies section to display for clients.
- *Stack: · ReactNative · REST API · Typescript · React Navigation*
- *Link: https://github.com/didier-cruz/MoviesApp*

Demo: https://surl.lt/geotzp

Administrative Backoffice 2024 – Current

- A network of clinics and doctors that lets patients in the USA search by symptom or specialty, see real procedure prices up front, and book directly — instead of guessing what care will cost.

Stack: React · Node.js · REST API · React Router

MINSAL Inventory System 2023 – 2024

- Government-scale administrative web app for inventory management and control. Modular Vue.js frontend with Node.js backend, serving the national Ministry of Health.

Stack: Vue.js · Node.js · REST API · Vuetify

ANDA Admin System 2023 – 2024

- Full frontend build for water authority's administrative platform. React + Tailwind CSS, focused on accessibility, component reuse, and performance.

Stack: React · Tailwind CSS · REST API, React Router
